

# Earth & Muhammed

Muhammed was a curious child who wanted to know more about the planet he lived on. He asked his parents about it and they told him about Planet Earth. They told him that it was a special place, and that it was the only planet known to have life on it.

Muhammed was so excited to learn about Planet Earth, and he wanted to help save it. He learned about the importance of reducing waste, conserving energy, and protecting the environment. He also learned about the importance of taking care of the plants and animals that live on Earth. Muhammed knew that if everyone worked together, they could make a difference and help save Planet Earth.
